Facebook Messenger Latest APK 386.0.0.19.106 (307210740) is one of the best free apps. It is a database-driven chat application that allows users to chat with other people privately, face to face or in groups. It can be used simultaneously as a chat application, a mobile text messaging service, and for incoming or outgoing phone and video calls. This so-called all-in-one application is seen as a threat to the takeover of traditional mediated communication methods such as texting and phone calls. Facebook Messenger File Details Last Updated: November 12, 2022 Developer: Facebook Version: 386.0.0.19.106 (307210740) Requirements: Android 5.0 and up File Size: 54.8 MB Uploaded: November 12, 2022 at 12:07 PM, w e8a4d106025b3ee3bb5fd2606520017 SHA1: fd8502fd34bf3efa96eeb9c6617919b8e737ea65 Available on Google Play: Install from Google Play app An overview of the benefits of Facebook Messenger for Android. With Messenger, you can send audio clips, images, videos, and your own large emoticons. There is also a feature that allows users to send money through the service they offer. This app has huge stickers that are displayed as cute, small and high quality images. If you download the app only for the immersive entertainment and not for the main messaging function, you can use the VoIP calling or video chat functions. The voice call function allows us to communicate in a group. In addition, Facebook has made privacy its main concern. That's why the developers created the secret chat mode to respect the privacy of their users. You can set the mode in settings and choose one phone as default phone. This feature is called Secret Conversation because it is fully encrypted. This means that users can only read on the device they have chosen to send and receive messages. Neither Facebook nor law enforcement can receive messages. Activates stealth modes encrypted using the open source signals protocol. This means that messages can only be read by recipients using the secret conversation mood. In normal messaging, it is encrypted to prevent eavesdropping using encryption keys. This feature is also available in WhatsApp, which is also developed by Facebook. However, the messages can still be read by Facebook or by law enforcement based on a court order. Here are the pros and cons of this app. Pros: This is a free app. Your privacy is safe. Funny app. Cons: Too many trivial extra built-in apps. How to use it doesn't require a lot of steps and explanations to get you started. You don't need to create and have a Facebook account to use this messenger. Basically, it only accepts your mobile phone numbers. When it comes to setup, you will be asked to enter mobile phone numbers and allow access to contacts. Setup doesn't take much time. If you already have a Facebook account, simply start the setup by logging into your existing account. After completing the required process, you are already logged into the app and ready to use it. After confirmation, all messages and contacts will be transferred automatically. List of changes 6 years and 12 months ago. It's too sad for me because my mobile version is too old for this app. Package Name: com.facebook.orca Version: 386.2.0.22.106 (307211203) File Size: 54.8 MB Updated: November 16, 2022 Minimum Android Version: Android 5.0 (Lollipop, API 21) Display DPI: 360-640 dpi Architecture: 640 dpi Architecture armeabi-v7a MD5: a7b31677a583bc0ae5e463d2b9f997 We4 that4ath4th3bth8fe06f9997 SHA3b Get the latest version of all available Messenger features. This version includes Shared Pay, a new group chat feature that makes it easier to share rent, travel and other expenses with friends and family. GB Whatsapp LuckyFacebook Lite FM WhatsApp YOWhatsApp WhatsApp APK Android Communication Instant Messaging As it could not be otherwise, the most famous social network with many users around the world has its own communication application: Facebook Messenger. This is a service that allows you to write, talk or make a video call with anyone, whether you are friends on Facebook or not, as long as you have a phone number: a good way to get closer to other services such as WhatsApp, LINE or Telegram. Stay connected with our universal communication application. Over time, it has added features and new features that have made it a very interesting application that has left behind the classic concept of texting: video and audio calls, sending media files, creating groups, sharing streaming videos... Key features Individual or group messaging the news. In addition to text, it allows you to express yourself better with stickers, gifs, emoticons and reactions. Free voice and video calls using VoIP with high quality audio and video and interactive features such as masks or filters. Turns on temporary mode so that read messages disappear when you exit the chat. Chats are fully customizable with different themes and colors. The Watch Together option allows users to come together and watch videos, movies or TV shows from the Messenger room at the same time. Video chats can be created without a time limit and with a limit of 50 people. Voice messages can be recorded and sent if text is not enough. The system makes it easy to make plans between friends using surveys, recommending places to meet or swap places. Allows you to contact companies directly to place an order or access customer service. In addition to all Messenger messages, the SMS service can be integrated into the app. A user can create a shortcut to the conversations and groups they interact with the most. Notifications can be turned off during specific time periods, such as school, work, or sleep. Photos and videos can be downloaded directly from the app and shared in conversations. In the privacy settings, you can choose who can contact you and where to receive messages. Allows you to connect with Instagram users by username. Includes dark mode for eye rest. So, if you are a user of this social network who likes to communicate with friends, do not miss the opportunity to download the application on your phone and you will have access to one of the most important and numerous communication networks in the world. What's new in the latest version Minor bug fixes and performance improvements. Requirements and additional information: Minimum system requirements: Android 5.0. Offers in-app purchases. Lauriane Guilloux Hi, I'm Lauriane Guilloux. I grew up surrounded by gadgets and technology, and anyone who knows me assumes this will always be one of my greatest interests. I have evolved hand in hand with PCs, laptops, video game consoles, smartphones, etc. Shay OatToole Chat with all your contacts - fast, easy and cheap. Official VK messaging app Convert speech to text in real-time Instant messaging with all your friends Support for advanced Android features Filter out annoying unwanted calls. Alternative email client for Outlook. Contact your friends directly on their phones, receive and send messages quickly, text everyone at once, and more. Features: Text messaging and free voice and video calls. Disappearance mode: the viewed message disappears. Tons of emoticons and stickers. Watch together, which allows you to watch TV shows and movies with your friends. Messenger (package name: com.facebook.orca) is developed by Meta Platforms, Inc. and the latest messenger version 387.0.0.22.106 was updated on November 11, 2022. The messenger belongs to the category Communication with iFITT integration and free calls etc. You can check out all messenger developer apps and find 200 alternative apps for Android. Messenger is one of the top 10 free calling and texting apps. This app is currently free. This app can be downloaded for Android 5.0 or later from APKFab or Google Play. All APK/XAPK files on APKFab.com are genuine and 100% safe with fast downloads. Stay connected anytime with our free* all-in-one messaging app that includes unlimited text, voice, video calls and group video chats. MESSAGING AND CALLS BETWEEN APPS Chat with your Instagram friends directly from Messenger. Just search for them by name or username to send a message or call.
