How to play solo zombies cold war

Now, I downloaded this game as a week ago, and I'm practically enjoying this! I know what you could say: "This game has not been updated since 2013, how is it okay?" Well, this is why I did my pros and cons of this game. Let's start with professionals: First of all, you can play wherever you want. Secondly, I think back to at least 25 max zombies for Round, which means that going to high shifts is really easy. Third, everything you really need for this game is the Zeus cannon and a ray gun that is a fist. Fourth, in Kino, you can actually play music like the console version! Last but not least, you can save your game. So if your phone or iPad needs to load, save the game and you returned where you were. Now, upon. Remember, this is my opinion, so you don't need to agree. First of all, the game is too easy, which you can easily exit from sticky situations, like in a corner. You are able to move the zombies if you come across them, which supports my first with. Second, sometimes you are stuck on invisible barriers that are where it should not be an invisible barrier. Third, if you make the grenade animation and try to exchange your gun at the same time, do not have weapons. And after 4 seconds, you'll go down. Last but not least, when you kill a crowd of zombies, the character you used use 2 or 3 lines at the same time. So this is everything. I advise? I do it. So buy it if you want!
