Church of the savior on the spilled blood.

This wonderful Russian-style church was built on the spot where Emperor Alexander II was assassinated in March of 1881. After taking power in the 1855 in the wake of Russia's disastrous defeat in the Crimean War against Britain, France and Turkey, Alexander II began a number of reforms. In the 1861 he freed the serious Russians (peasants, who were almost enslaved to their owners) from their ties to their masters and undertook a rigorous program of military, judicial and urban reforms, never attempted before in Russia. However, during the second half of his reign Alexander II grew up on the dangers of his reform system, having only barely survived a series of attempts of his life, including an explosion in the winter palace and the derailment of a train. Alexander II was finally assassinated in 1881 by a group of revolutionaries, who dropped a bomb on his royal carriage. The Church of our Saviour on the blood spilled was made the decision to build a church on the place where the emperor was mortally wounded. The church was built between 1883 and 1907 and was officially called the resurrection of the Church of Christ (A.k.a. Our Savior's Church on spilled blood). The construction of the Church was almost entirely financed by the imperial family and by thousands of private donors. Both the interior and the outside of the church are decorated with incredibly detailed mosaics, designed and created by the most important Russian artists of the day (V.m. Vasnetsov, M.V. Nesterov and M.A. Vrubel). It is interesting to note that, despite the obviously Russian aspect of the Church, its architectural principle, A. Parland, was not even Russian by birth. The Church was closed for services in the 1930s, when the They went on an offensive against religion and destroyed churches all over the country. It remained closed and under restoration for over thirty years and was finally reopened in the 1997 throughout its Ancient splendor. The view of the Church of Nevsky Prospekt is absolutely breathtaking. Note: the translations of the Church's name vary between the guides and include the Church of the Savior on the Blood, the Church of the Resurrection and the Church of the Resurrection of Christ. Location: Naberezhnaia Kanaia Griboдова. Reopened at the end of August 1997 after almost 30 years of restoration. Veliky Novgorod's journey: the birthplace of Russia The works ended under the reign of Nicholas II, in the 1907, and the necessary funds came from the cashier of the imperial family and numerous private donations. In World War II, during the blockade of Leningrad (the previous name of the city), a bomb fell on top of the highest dome of the church, although it did not explode, and was found and removed almost twenty years later. It was therefore decided to complete the restoration of the Church, and after 27 years (in the mid-1990s) it was inaugurated as a state museum where it is possible to know the murder of Tsar Alexander II.
