1 As system administrator, you type "debug ipx sap" and receive the following lines as you can see: response: type 0x4 "HELLO!", 199.0002.0003.0006 (451), 2 hops type 0x4 "HELLO!", 199.0002.0003.0008 (451), 2 hops What does "0x4" signify?  
 A. That it is a Get Nearest Server response.  
 B. That it is a General query.  
 C. That it is a General response.  
 D. That it is a Get Nearest Server request.  
 Ans: A

2 To monitor IP igmp traffic, you can use "debug ip igmp transaction" or "debug IP igmp events". How do you display information about IPX routing update packets?  
 A. debug routing  
 B. debug ipx transaction  
 C. debug ipx routing activity  
 D. debug ipx events  
 Ans: C

3 To monitor ipx traffic on a network, what command would you use?  
 A. debug ipx transaction  
 B. show ipx traffic  
 C. show ipx events  
 D. display ipx traffic  
 Ans: B

4 What command would you use to find out the names of Novell servers on a network?  
 A. show ipx servers B. show ipx hosts  
 C. show ipx sap  
 D. show ipx nodes.  
 Ans: A

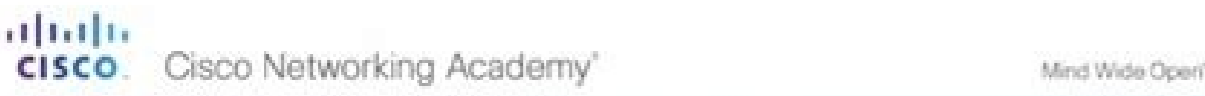

5 The "ipx delay number" command will allow an administrator to change the default settings. What are the default settings?  
 A. For LAN interfaces, one tick; for WAN interfaces, six ticks  
 B. For LAN interfaces, six ticks; for WAN interfaces, one tick  
 C. For LAN interfaces, zero ticks; for WAN interfaces, five ticks  
 D. For LAN interfaces, five ticks; for WAN interfaces, zero Ticks  
 Ans: A The default is—for LAN interfaces, one tick; for WAN interfaces, six ticks

6 As a system administrator, you need to set up one Ethernet interface on the Cisco router to allow for both sap and Novell-ether encapsulations. Which set of commands will accomplish this?  
 A. interface ethernet 0.1 ipx encapsulation Novell-ether ipx network 9e interface ethernet 0.2 ipx network 6c  
 B. interface ethernet 0 ipx encapsulation Novell-ether ipx network 9e interface ethernet 0 ipx encapsulation sap ipx network 6c  
 C. interface ethernet 0.1 ipx encapsulation Novell-ether interface ethernet 0.2 ipx network 6c  
 D. interface ethernet 0.1 ipx encapsulation Novell-ether ipx network 9e interface ethernet 0.2 ipx encapsulation sap ipx network 6c  
 Ans: D

```

Router1
Physical Config CLI
IOS Command Line Interface
Router>enable
Router#configure terminal
Enter configuration commands, one per line. End with CNTL/Z.
Router (config)#interface serial 0/0/0
Router (config-if)#ip address 192.168.0.2 255.255.255.252
Router (config-if)#exit
Router (config)#interface serial 0/0/1
Router (config-if)#ip address 192.168.0.5 255.255.255.252
Router (config-if)#clock rate 64000
Router (config-if)#bandwidth 64
Router (config-if)#no shutdown
Router (config-if)#exit
    
```

**CCNA: Principios básicos de routing y switching**  
**Evaluación de habilidades: examen de capacitación del estudiante**

**Topología**

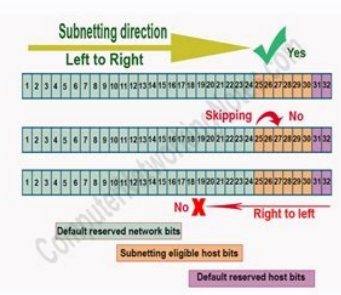

VLAN	Dirección IP	Nombre
31	192.168.31.0/24	Contabilidad
32	192.168.32.0/24	Ingeniería
99	192.168.99.0/24	Administración

**Objetivos de la evaluación**

- Parte 1: inicializar dispositivos (8 puntos, 5 minutos)
- Parte 2: configurar los parámetros básicos de los dispositivos (28 puntos, 30 minutos)
- Parte 3: configurar la seguridad del switch, las VLAN y el routing entre VLAN (14 puntos, 15 minutos)
- Parte 4: configurar el protocolo de routing dinámico OSPFv2 (24 puntos, 25 minutos)
- Parte 5: implementar DHCP y NAT (13 puntos, 25 minutos)
- Parte 6: configurar y verificar las listas de control de acceso (ACL) (13 puntos, 25 minutos)

These following portions have been removed from the curriculum – LAN Switching; Frame, VTP, Switch stack; Routing: EIGRP, RIPv2, OSPFv3, multi-area OSPF; WAN: PPP, MLPPP, PPPoE, GRE, BGP, WAN access. Pricing Of The Exams: The pricing of the exam for CCNA 200-301 is \$300, slightly less in comparison to the previous exam. The new CCNA gives a base salary which you can scale up with next-level certifications. Understanding cabling types, uses, Ethernet operation, TCP, UDP, and IP routing is still essential. You'll Get The Same Certification: If you have any current CCNA certificates (CCNA Routing and Switching, CCNA Industrial, etc.), then you will automatically be receiving the new CCNA certificate. We will discuss the new Cisco CCNA exam in this article and compare it to the old one. The CCNA 200-125 covers the following topics: LAN Switching Technologies IPv4 and IPv6 routing technologies WAN Technologies Infrastructure Service Infrastructure Security Infrastructure Management Network Fundamentals Features Of The CCNA 200-301 Exam The new CCNA will be a single exam and will be 120 minutes long. These are meant to be scheduled at separate times. Don't stress. The new CCNA exam will be testing you on these exact topics. We hope it was helpful in guiding you through your studies this month. Those who are working for their ICND1 and ICND2 exams should try hard to complete them before February 24, as doing so is only to their advantage. About Cisco accounts Features of the New Cisco CCNA 200-301 As we all know, several changes are coming to the CCNA as of February 24, 2020. This infographic from Cisco explains the changes that have taken place and how they can affect you. Just because something is no longer included in the new exam, doesn't mean it isn't applicable to the real world. CCENT and CCNA are being consolidated into one single certification. You have to now know Cisco's latest tools for building and managing networks. The other things which have changed are those that become different with almost every revision of the test. Get hands-on training in just 6 months. The current standing cost for ICND1 and ICND2 are \$165 per exam (totaling \$330 if you pass on your first attempts.) Less To Study: CCNA 200-301 is estimated to be 25% smaller than the old CCNA 200-125 exam. Interested in kickstarting your career in the IT field? Personalized content Your products and support. Log In Don't have an account? Avoid Unnecessary Stress: It can be stressful to see topics you spent a lot of time learning are no longer relevant. We'll discuss the similarities in detail in a later section. We invite any questions or comments about this blog post and welcome you to visit our site www.nexgent.com We will also talk about why it's best to get your CCNA certification right away before the changes take place. Sharing Similar Topics: Someone who has only completed ICND1 will still benefit as several topics between ICND1 and the CCNA 200-301 will be identical. How Are The Old CCNA And The New CCNA Exams Different? The CCNA 200-125 and the new CCNA 200-301 exam differ in importance given to different modules as well as in some other areas. Weightage Differences CCNA 200-125 CCNA 200-301 –WAN Technologies (10%) –Infrastructure Service (10%) –Infrastructure Security (11%) –Infrastructure Management (10%) –Network Fundamentals (15%) –LAN Switching Technologies (21%) –Routing Technologies (23%) –Network Fundamentals (20%) –IP Services (10%) –Security Fundamentals (10%) –Network Access (20%) –IP Connectivity (25%) –Automation & Programmability (10%) Changes in Syllabus: Apart from the shift in weightage of specific modules, some topics have been scrapped for the new CCNA 200-301 exam. Think of it as extra real-world knowledge! CCNA Is Valid For Three Years: Exam Versions are rarely taken into consideration by hiring managers. If you take your certification now, you'll not have to do so for another three years. Similarities Between The Old CCNA And The New CCNA Core CCNA topics have traditionally included knowing OSI and its first four layers. Almost 80% of the exam covers the topics of the previous generation, which means your prior studying won't go to waste. Learn How Features Of The CCNA 200-125 Examination The CCNA 200-125 consists of two 90-minute exams, ICND 1 & ICND 2. It will start from February 24, 2020, and is more comprehensive. These are higher layer concepts and networking protocols. 1 Describe the routing concepts a) Packet handling along the path through a network b) Forwarding decision based on route lookup c) Frame rewrite 2 Interpret the components of a routing table a) Prefix b) Network mask c) Next hop d) Routing protocol code e) Administrative distance f) Metric g) Gateway of last resort 3 Describe how a routing table is populated by the different routing information sources a) Admin distance 4 Configure, verify, and troubleshoot inter-VLAN routing a) Router on a stick b) SVI 5 Compare and contrast static routing and dynamic routing c) Compare and contrast distance vector and link state routing protocols 7 Compare and contrast interior and exterior routing protocols 8 Configure, verify, and troubleshoot IPv4 and IPv6 static routing a) Default route b) Network route c) Host route d) Floating static 9 Configure, verify, and troubleshoot single area and multi-area OSPFv2 for IPv4 (excluding authentication, filtering, manual summarization, redistribution, stub, virtual-link, and LSAs) 10 Configure, verify, and troubleshoot single area and multi-area OSPFv3 for IPv6 (excluding authentication, filtering, manual summarization, redistribution, stub, virtual-link, and LSAs) 11 Configure, verify, and troubleshoot EIGRP for IPv4 (excluding authentication, filtering, manual summarization, redistribution, stub) 12 Configure, verify, and troubleshoot EIGRP for IPv6 (excluding authentication, filtering, manual summarization, redistribution, stub) 13 Configure, verify, and troubleshoot RIPv2 for IPv4 (excluding authentication, filtering, manual summarization, redistribution, stub) 14 Troubleshoot basic Layer 3 end-to-end connectivity issues Programs Admissions Financial Aid Student Success About Giving Have an account? It covers the following topics: IP Connectivity: IP routing, OSPFv2/IP Services: NTP, DHCP, SNMP, QoS Security Fundamentals: VPNs, wireless security, port security Network Access: VLANs and trunking, EtherChannel Automation and Programmability: REST APIs, Puppet, Chef, JSON, SDN, etc. Network Fundamentals: Including routers, switches, cabling, TCP and UDP, IPv4 and IPv6 Related: FAQ about the new and old CCNA Thank you for taking the time to read this post. The Cisco CCNA 200-301 is also no different: Physical Layer of OS Data Link Layer Network Layer Transport Layer Networks 15 years ago were assembled in a similar way to modern ones. Although CCNA certification has been standard for many years, the exams keep changing to keep up with industry needs and trends. Sign up For got your password?
