The Foundation for constitutional rights inspires a civic commitment throughout life through interactive programmes and resources for teachers and young people, because our democracy depends on the informed participation of all. Competent. Accessible. Interactive. Not partisan. Diffusion. Standard aligned. Innovative à relevant à Student-centered àc Standards-aligned Help us close the gap of civil opportunity. Page 2 Security Content Table..... 2 Maintenance..... 14 Setup..... 6 List of parts and Diagram..... 19 Specifications... 6 Warranty..... 23 Operation..... 8 SIMBOLI AND DEFINITIONS This is the security alarm symbol. It is used to warn you of potential risks of personal injury. Obey all security messages following this symbol to avoid possible injury or death. Precautions (continued) 9. Improper connections to an electrical building 10. Do not operate the generator before grounding. The system can allow the power supply from the generator must be a ground generator that goes back against the utility lines. In accordance with all relevant electrical equipment, this recession can shine the codes and norms of the utility company before operation. Page 4 38. Keep hands and feet away from mobile parts. Take 26. Use only the accessories that are recommended not to reach or through the generator during operation. Harbor Freight Tools for your model. Accessories suitable for a 39. Before use, check misalignment or bond... Service precautions 1. Before service, maintenance or cleaning; 8. Run the service of a qualified repairer using only identical spare parts. a. Remove all devices from the generator. This will ensure the safety of the equipment b. Turn the motoswitch to it à position. is maintained. DescriptionSpecifications 120V/240V~, 60Hz Rated Output 5500 Watts (6500 max) Generator Due 3-Prog, duplex NEMA 35; 5-20 120V Electrical Recale One 4-Progng, NEMA NEMA A DC Outlet 12VDC Dispersion 420cc Single horizontal cylinder 4-stroke OHV Engine Type EPA Phase III compliant air cooling system... Page 7 Components and Controls (below) The following are descriptions of the controls on the power panel. Your generator has taken to power your products with circuit breakers: the circuit breaker protects the straps to protect the voltage flow. Overcharging generator. The breaker score and the load it protects are marked near the breaker. Original Tool Set Up/Assembly CASES: This generator is not intended to power Read the IMPORTANT ENTORIES sensitive electronic equipment without adding a SECURITY INFORMATION section to the appropriate line conditioner and roller protection (both not at the beginning of this included manual). I'm checking and refueling! TO PREVENT SERIOUS PREVENTION PREVENTION PREVENTION FROM THE ENTERPRISE: Fill the fuel tank in a well ventilated area, at a level completely distant from the ignition sources. If the engine is hot from use, turn off the engine and wait for it to cool down before adding fuel. Start engine one. To start a cold engine, move the Choke to the CHOKE position. To restart a hot engine, leave the Choke in the RUN position. 2. Open the fuel valve. 3. Activate the engine. 4. Connect electrical loads Familiarity with engine controls, power panel and how to start the engine before using the generator. Calculate the power of the products used with the generator and verify that the generator can handle the total load. Page 12 Calculate the total Watching of the devices used with the estimated Generator tab Before using the Generator, check that the products you want to insert into the unit are At the nominal value and note: the waters listed below are estimates for maximum generator power evaluations. Stop the engine in an emergency 1. To stop the engine in an emergency, turn off the engine. Notice: the shutdown generator under load can can The connected generator and equipment. Engine stopping under normal conditions 1. Before turning off the engine, turn off all electrical loads, then delete them. User maintenance instructions to prevent serious injury from accidental operation: Turn the generator power switch to its "OFF" position, wait for the engine to cool down, and disconnect the spark plug before performing any inspection, maintenance or Cleaning procedures. To prevent the Serious injury from the equipment failure: do not use damaged equipment. Fuel control and filling Note: Do not use fuel containing more attention! Selected Serious 10% ethanol (E10.) Do not use E85 ethanol. INJURY FROM FIRE: Fill the fuel tank into a well-ventilated area Note: Do not use gasoline that has been stored in a distance from ignition sources. Maintenance of spin sparks 1. Disconnect the plug cap from the end of the plug. 4. When installing a new plug candle, adjust Clean Out debris from about spark plug. The plug gap to specifications on the specifications chart. Don't get angry against the 2. Troubleshooting problem Possible causes Probable Solutions Engine causes Fuel Related: Fuel Related: 1. No fuel in tank or fuel valve closed. 1. Fill the fuel tank and the fuel valve open. 2. Do not coke in Choke position, cold engine. 2. Move choke to Choke position. 3. Page 18 Troubleshooting (cont.) Problem Possible causes Probable engineer Misfires 1. Sparking sparking cap loose. 1. Check the wire connections. 2. Lack of incorrect spark plug or 2. Re-gap or replace spark plug. Damaged spark plug. 3. Defective candle cap. 3. Replace the candle cap. 4.
