Android app for excel sheet

Google LlciniTial ReleasemarkchÃ, 9, 2006 Google Llciolet Cloud Calculation Sheets, 9, 2006; 15 years agoA (2006-03-09) Written injavaScriptoperating Systemandroid, iOS, MacOS, Windows, Blackberry, Chrome Osavailable In83 Languages [1] Software Sheets Collaborative Type Google Website WebsiteWwW.google.com/sheets/about/ A spreadsheet supplied as part of the free, Google Docs Ed Editors Web-based suite offered by Google. The service also includes Google Docs, Google slides, Google Drawings, Google Forms, Google Sites and Google Keep. Google sheets is available as a web application, mobile app for Android, iOS, Windows, Blackberry, and as a desktop application on Google Chrome OS. The application is compatible with Microsoft Excel file formats. [2] The application allows users to create and edit online files, while collaboration with other users in real time. The changes are monitored by the user with a revision story that has changes. The position of an editor is highlighted with a specific-publisher and cursor color and a system rule allowed that users can do. Updates have introduced functionality using Machine Learning, including "Explore", offering answers based on questions in natural language in a spreadsheet. The history of Google Sheets originated by XL2WEB, a web-based spreadsheet developed by 2Web Technologies, which was acquired by Google in 2006 [3] and transformed into Google Labs Spreadsheets. It was launched as a test for a limited number of users, on a first arrival, first served June 6, 2006. [4] [5] The limited test was then replaced with a beta version available for all holders of A Google account, around the same time as an official press release announcement has been issued. [6] In March 2010, Google acquired the Docverse company document collaboration. DOCVERSE Multiple users allowed online collaboration on Excel compatible document and other Microsoft Office formats such as Word and PowerPoint. [7] Docverse-based improvements have been announced and distributed in April 2010. [8] In June 2012, Google acquired QuickOffice, a freeware owner productivity suite for mobile devices. [9] In October 2012, Google Spreadsheets has been renamed Google Sheets and Chrome was released that he provided sheets on the New Chrome card page. [10] Platforms Google Sheets is available as a web application supported on Google Chrome, Microsoft Edge, Mozilla Firefox, Internet Explorer and Apple Safari web browser. [11] Users can access all spreadsheets, among other files, collectively, through the Google Drive website. In June 2014, Google implemented a dedicated website home page for leaves containing only files created with sheets. [12] In 2014, Google launched a dedicated application for sheets on Android and iOS mobile operating systems. [13] [14] [15] In 2015, the mobile website for the sheets has been updated with a "simpler, more uniform" interface, and while users can read the spreadsheets through websites phones , users who try to change will be redirected to the mobile application to delete the modification on the mobile web. [16] Apps scriptdeveloper (s) GoogleInity Releaseaugust, 19, 2009; 12 years agoA (2009-08-19) [17] Application Framework injavascriptypeweb written, scripting LanguageWebsitesScript.google.com Google sheets serves as a collaborative tool for real-time spreadsheet cooperative editing. Documents can be shared, open, and modified by multiple users simultaneously and users are able to see character changes by character, as other collaborators make changes. Changes Automatically save to Google servers, and a revision story is automatically maintained so changes can be displayed and returned to. [18] Current position of an editor is represented with a specific color / cursor mounting, so if another editor seems to be the display of that part of the document can see the changes that occur. A sidebar chat feature allows collaborators to discuss changes. The revision history allows users to see the additions made to a document, document, each author distinguished by color. Only adjacent revisions can be compared, and users can not control the rate at which the revisions are saved. Files can be exported to a user's local computer in a variety of formats such as PDF and Office Open XML. [19] media Sheets encoding for archival purposes and organizational. Explore Launched for the entire suite units in September 2016, "Explore" it allows additional features through machine learning. [20] [21] [22] In Google Sheets, Windows Explorer allows users to ask questions, such as "How many units were sold on Black Friday?", And Explore will return the answer, without requiring knowledge on the part of the formula 'user. In June 2017, Google has expanded the Explore feature in Google Sheets to automatically build charts and data display, [23] [24] and again expanded in December to machine learning feature can automatically create pivot tables. [25] [26] In October 2016, Google announced the addition of "action items" the sheets. If a user assigns a task within a sheet, the service intelligently assign such action for the designated user. Google says this way it will be easier for other contributors to see who is responsible for a task. When a user visits Google Drive or Sheets, all files that contain their assigned tasks will be highlighted with a badge. [27] In March 2014, Google introduced add-on; new tools from third-party developers that add more features to Google Spreadsheets. [28] offline editing In order to view and edit spreadsheets offline on a computer, users must be using the Google Chrome web browser. An extension to Chrome, Google Docs offline, allowing users to enable offline support for Sheets and other files with bathroom Drive on the Google Drive website. [29] The Android and iOS native support offline editing. [30] [31] The file formats supported files and limits the file can be viewed the following formats and converted to the format Spreadsheets: .xls (if more recent Microsoft Office 95), .xlsx, .ods .xlsm, xlt , .xltx, .xltm ,. .csv, .tsv, .txt, .tab [32] overall size of the document is limited to 5 million cells. [33] [34] Google Workspace The Sheets app and the rest of the suite Google Docs editors are free to use for individuals, but the sheets is also available as part of the business work centered Google (ex G Suite) from the Google service, which is a monthly subscription that enables business focused additional functionality. [35] The integration with charts and sheets of Wikipedia can produce Google Charts [36] and a third-party plugins, which allows integration with Wikipedia. [37] Other functionalities A simple find and replace tool is available. The service includes a web clipboard tool that allows users to copy and paste content from Google Spreadsheets and Documents, slides and drawings. The web clipboard can also be used to copy and paste content between different computers. copied elements are stored on Google servers for up to 30 days. [38] Google offers an extension for the Google Chrome web browser called Office editing for Docs, Sheets and Slides, which allows users to view and edit Microsoft Excel documents on Google Chrome by applying sheets. The extension can be used to open Excel files stored on your computer using Chrome, as well as for opening files met on the web (in the form of email attachments, web search results, etc.) without having to download them . The extension is installed by default on Chrome OS. [39] As of June 2019, this extension is no longer necessary because Native functionality exists. [40] Google Cloud Connect is a plug-in for Microsoft Office 2003, 2007 and 2010 that you could store and synchronize any Excel Document to Google Sheet automatically (before the introduction of the drive). Online copy has been updated whenever the Microsoft Excel document has been saved. Microsoft Excel documents can be changed offline and synchronize later when in line. Google Cloud Connect maintained the versions of the previous Microsoft Excel documents and allowed more Collaborate working at the same document at the same time. [41] [42] However, Google Cloud Connect was interrupted from 30 April 2013, as, according to Google, Google Drive reaches all the tasks indicated above ", with better results". [43] While Microsoft Excel keeps the bug of the 1900 jump biscuit, Google sheets "corrects" this bug by increasing all the dates before 1st March 1900, then entering "0" and formatting as a date returns on 30 December 1899. On the other hand. Treats Excel "0" As on 31 December 1899, formatted to read on 0 January 1900.
