Lecture notes in networks and systems

Department of Mechanical Engineering Center for Control, Dynamical-Systems, and Computation University of California, Santa Barbara bullo at ucsb.edu Edition 1.4, Jul 1, 2020 332 pages and 171 exercises Kindle Direct Publishing ISBN 978-1-986425-64-3 The book may be purchased or downloaded in the following versions: printed paperback version (Amazon link), published by Kindle Direct Publishing (7in x 10in, gray-scale, xii + 320 pages), ISBN 978-1-986425-64-3 tablet version [PDF file], optimized for viewing on tablets (3x4 aspect ratio, color), freely downloadable from the book website three versions/documents meant for instructors and classroom teaching: slide version [PDF file], that is, an abbreviated version suited for displaying on a classroom projector classroom markup version [PDF file], that is, an abbreviated version (lettersize, with large sans-serif fonts, small margins), meant as markup copy for classroom teaching (i.e., print, mark, teach, discard) a solution manual (PDF format) for instructors at accredited institutions planning to use this book for a course. The manual is freely available upon request (would you please let me know what course you plan to use the text for?). Additionally, the following documents are downloadable: Citation information @Book{FB-LNS, author = {F. Bullo}, title = {Lectures on Network Systems}, year = 2020, edition = 1.4, publisher = (Kindle Direct Publishing), ISBN = (978-1986425643), note = (With contributions by J. Cortes, F. Dorfler, and S. Martinez), url = (.) Copyright information This book is intended for personal non-commercial use only: you may not use this material for commercial purposes and you may not copy and redistribute this material in any medium or format. Why I decided to self-publish a print-on-demand book There are several reasons why I decided to self-publish this book via the print-on-demand service by Kindle Direct Publishing (former Amazon CreateSpace). I appreciate the ability to: retain the full copyrights of all the material, make the document freely available online in multiple versions (see above), keep the paperback publication costs to a minimum, update the book revision at any time (simply re-upload the PDF file, minimal turn-around time, no need for any permission, and never out-of-print), and make available a high-quality paperback book through a broad distribution network. Similar arguments are presented in the write-up Why I Self-Publish My Mathematics Texts With Amazon by Robert Christ History Jun 1, 2016: version .85 posted online May 1, 2018: version 1, revision 1.0 Jan 1, 2019: version 1, revision 1.2: Since the first edition on May 1, 2018, I have corrected several typos and inconsistencies, redrawn a few figures, added assumptions missing in a few theorems, corrected an incomplete proof, added a few new exercises, removed an inaccurate exercise, and polished a few old exercises. Jul 1, 2019: version 1, revision 1.3: new chapter on diffusively-coupled linear systems, polished Section 6.4, polished Section 7.1.1, rewritten Section 7.4, rewritten Section 5.1 Jul 1, 2020: version 1, revision 1.4: extensive revisions on examples in Chapter 1, sharper bounds and monotonicity properties of the spectral radius of non-negative matrices, various improvements in each of the first ten chapters. Feedback I am thankful for any feedback information, including suggestions, evaluations, error descriptions, or comments about teaching or research uses. Please email bullo at ucsb.edu All Accepted and Registered full papers must be presented at the conference and will be published in Springer Series. The Proceedings of ICWSNUCA 2021 will be published in the Springer Series on "Lecture Notes in Networks and Systems", ** Indexing: The books of this series are submitted to ISI Proceedings, SCOPUS, Google Scholar and Springerlink ** Title proper: Lecture notes in networks and systems. Country: SwitzerlandMedium: Print Does not allow reviews to be publicly displayedOnly allows reviewers to display the journal they reviewed for In accordance with Lecture Notes in Networks and Systems' editorial policy, review content is not publicly displayed on Publons. We can put registered members of Publons' reviewer community in touch with partnered journals they would like to review for. Register now to let Lecture Notes in Networks and Systems know you want to review for them. Publons users have indicated that they sit on Lecture Notes in Networks and Systems' editorial board but we are unable to verify these claims. If you are an administrator for Lecture Notes in Networks and Systems, please get in touch to find out how you can verify the contributions of your editorial board members and more. Original research reported in proceedings and post-proceedings represents the core of LNNS. Volumes published in LNNS embrace all aspects and subfields of, as well as new challenges in, Networks and Systems. The series contains proceedings and edited volumes in systems and networks, spanning the areas of Cyber-Physical Systems, Autonomous Systems, Sensor Networks, Control Systems, Energy Systems, Automotive Systems, Biological Systems, Vehicular Networking and Connected Vehicles, Aerospace Systems, Automation, Manufacturing, Smart Grids, Nonlinear Systems, Power Systems, Robotics, Social Systems, Economic Systems and other. Of particular value to both the contributors and the readership are the short publication timeframe and the world-wide distribution and exposure which enable both a wide and rapid dissemination of research output. The series covers the theory, applications, and perspectives on the state of the art and future developments relevant to systems and networks, decision making, control, complex processes and related areas, as embedded in the fields of interdisciplinary and applied sciences, engineering, computer science, physics, economics, social, and life sciences, as well as the paradigms and methodologies behind them. Indexed by SCOPUS, INSPEC, WTI Frankfurt eG, zbMATH, SCImago. All books published in the series are submitted for consideration in Web of Science.
