I think it's really easy to use especially when you earn hearts and stars to vote. When you log in, there are quizzes and video ads to watch to earn hearts. The interesting thing is that when you set your idol, every time there is a competition to win a prize for your idol, there will be a small heart that says "My idolÀ e à,-" indicating that one Group members in your bias group or the whole group is in the competition. Overall it is only very easy and simple to use and maneuver! À * À¿À à à "e À, àwÀ À, so only by reading the other reviews, I understand that I am the only one with this problem. It's been about a month and I have not been able to watch any ads to earn stars and hearts. À e à,- "no longer available anymore ... it's all that says. I sent a couple of e-mails and this problem is still happening. The only reason why hearts die at all is due to the daily participation, publication, and the few missions and quizzes occasionally. If it was not for that, this app would be completely useless for me to use. Please adjust this. I want to be able to give stars, which is Something I didn't get since it was got just observing the ads. Even the late app a lot and takes a couple of minutes just to move to another card. And now I know that I am the only one who lives of these Problems. I love this app because it allows international fans to support their favorite artists voting for them. It is also very funny, where you can get different hearts and rubies while complete some fun missions and especially when we can get hearts while you do the quizzes. It's not difficult And to use and quite funny, not only we have the opportunity to support our favorites, but it can also check the knowledge of the groups we know by doing the quizzes. I hope you can do more quiz because I almost completed them all. Thank you so much for your service.
