Go to PowerPoint content is a professional presentation tool. It can be a challenge to understand how to insert PDF in PowerPoint presentations. Do you want to adjust PowerPoint presentation timing settings? View the PDF content in a slide, or add the PDF file as a support document that is connected to and presented during the presentation. Below, we will show you how to insert the contents of the PDF file into a PowerPoint with PDFelement Pro. Method 1. Enter PDF in PowerPoint with PDFelement P PDFelement helps you to convert PDFs to PowerPoint, Word and many other file formats easily without Lose the original layout. You can follow these simple steps to convert PDFs to PowerPoint or add PDF to PowerPoint. Step 1. Download and launch PDFelement Pro Download and install PDFelement Pro to your Mac or Windows. Start and click 'Open' to open the PDF file. Step 2. Conversion from PDF to PowerPoint Click on the 'Tool' menu in the toolbar on the left, choose 'PDF Converter' under the 'Batch Processing' list. Then drag and drop files in the pop-up window, or you can directly click 'add' to add PDF files. Select 'A PowerPoint' under the 'Format' drop-down menu, then click the 'Apply' button and choose a local folder to start the conversion. Step 3. Enter PPT PDF Open the PDF converted to PowerPoint; Then you can insert PDF pages to PPT. Method 2. Insert the PPT PDF as an image This method is a bit of alternative solution, but allows you to integrate the content quickly and with the best possible results. Step 1: Start PowerPoint and open a file You must first enter the PowerPoint, and then click the slide where you want to add the content. Step 2: Insert PDF as Screenshot Go to "Insert">"Images">"Screenshot", then click on the "Clipping of the screen" function you will find under Windows available. Step 3: Capture the screenshot and insert when you choose this option, PowerPoint will be automatically reduced and you will now be able to focus on the PDF file. In this particular moment, the cursor turns into a viewfinder, so all you have to do is drag a box around the content you want to cut out, as this will help you take a screen capture. Be aware of the fact that if you press the Esc key at a given time, cancel the process and, therefore, having to start over again. Method 3. Insert PDF files to PowerPoint as an object if you want to add the PDF as a support document for the slide, then you can also do it with PowerPoint. Follow these instructions to learn to add PDF to PowerPoint quickly and easily. Step 1: Start PowerPoint and open a file first, open PowerPoint, select the slide where you want to add the file. Step 2: Enter PDF in PowerPoint As an object then press 'enter / object'. You will open a new box where you will have to select the option 'Create from File', locate the PDF and then click to select the Open function. Once this is done, you will receive an Insert Object box, which you need to click OK to finish. Optional: Add links or actions to it if you want to use the PDF file has been connected to the PowerPoint slide, all you have to do is go to the slide, click the PDF icon, and then click on the 'function Links / Action '. Click on the tan, and then proceed with the object. Choose to activate the content from the list. With the help of PDFelement Pro, you can easily integrate the desired PDF content in any presentation. There are several options for adding a PDF in PowerPoint. With Our instructions, you should now be able to get rapid and easy results. This is how easy it can be to enter a PDF file in a PowerPoint presentation! When you have a number of images you want to import in your PowerPoint slide, you can simply copy the image to your clipboard and paste it into the PowerPoint slide if you don't know other methods. However, it's a long time. How to insert more images in a PowerPoint slide or the way to insert more In PowerPoint on several slides? This tutorial will teach you 6 ways to insert multiple photos to PowerPoint slides. Overview: 1. Create a photo album to insert more images in PowerPoint Photo Album lets you create a photo album from images files with facilities. It is very convenient for you to import many pictures into PowerPoint slides. Here several steps are introduced to you on how to enter more PowerPoint images on different slides. Step 1. Create a new Microsoft PowerPoint vacuum, click Insert> Photo album> New photo album. Step 2. In the photo album dialog box, make some settings needed for your PowerPoint images and slides. A Click the File / Disk button to enter the images from your hard disk, select the images, and then click Insert to add. Tips: You can press CTRL while you click to select multiple single images, or if you want to select a series of images, you can click on the first image and press the SHIFT key to click the last image of the series. Click on new text box. After creating your photo album, you can click on a text box in a slide and type the desired text. A f e Click the arrow behind the empty image layout and choose an image, more images or more title images. Default album photos uses suitable for slide with one image by filling a slide. A f use the frame shape to apply settings such as rounded rectangles, rectangle shadow center and etc. You can get a general effect of each setting to form preview thumbnail. A eLn reorganize or remove images using the buttons below the list of images based on your needs and requirements. A Y Use the icons buttons under the preview image to adjust the brightness and contrast or rotate an image. A | Tick captions under all images to automatically add the file name under each image. A A Choose a theme at the bottom of the dialog box or choose a theme from the Tardo Design tab. A, a " after finishing all the settings according to your needs, click the button to create a photo album Create. Step 3. Do other steps to complete your PowerPoint photo album and slides as the addition of names To images, to type text needed, set animations and transitions, and etc suggestions: if you want to add images or otherwise change your photo album later, return to the Insert card and click the arrow next to the Photo Album button, then choose Edit photo album. The method of creating a photo album introduced here makes time savings to convert more images you have in your hard disk for PowerPoint slides. What's more, can be used even if you need to add more images for an existing PowerPoint presentation. 2. Use scrolling background images in PowerPoint Presentation You can use images as a background PowerPoint slides in the presentation. It is more suitable for the situation in which the photos are not the main objective of the slide. But there is no doubt that the use of this method can improve the presentation. Step 1. Click on the slide and select Design> Background Styles> Background format. Step 2. In the Fill section of the Background format dialog box, click Image or Texture Fill. Click File to open the Insert File dialog box, locate the location of your photos, and select the images you need, then click Insert. You can adjust the background settings to your preferences. You can move the transparency cursor to make the background more or less clear, support the image in all the background by clicking Tile image as a texture, and adjust the offset settings to change the appearance of the tiles image. Step 3. Click another PowerPoint slide and repeat the previous steps to enter additional background images. You can use a single image for each slide background, or have different images for each different slide. 3. Use individual photos in PowerPoint slides if you want images next to the text or other items to illustrate the point, you can enter individual images in slides. Step 1. Click on the side, click the Insert tab and choose Image to open the La Image dialog box. Step 2. Switch to the position of your photos, select the image you want to insert and click the Insert button. Step 3. Click another PowerPoint presentation slides where you want to insert images and repeat the previous steps. 4. Use the Layout option in PowerPoint You don't know how to enter more images in a PowerPoint slide? When you enter multiple images to a new slide, you can choose the layout option that allows you to add images with a single click. Steps As follows: Step 1. Right-click on the slide and click Layout, you can choose existing layouts that have image placeholder. O Change the slide master to add layouts with more image placeholder. Step 2. Go to View> Slide Master> Insert Layout. A new slide will appear on the screen. Click Insert Placeholder and click the Image button to add image placeholder. Tips: In the Slide Master tab, you can insert placeholders, modify topics and background styles, format the placeholders and much more. After adding the placeholders on the slide, you can close the main view. Step 3. Return to view> Normal, the new custom layout will be displayed as an option in the Layout menu, click and open it. Add image to image placeholders by clicking the image icon on the slide. 5. Use the Form Filling with Option images in PowerPoint Step 1. Click Insert> Forms, select the form you want to use and draw the shape on the slide. Step 2. Double-click the form to open the drawing tools, click Filling Form then select the image in the drop-down list. Step 3. Insert more images with different shapes using this method. 6. Use the Smartart option in PowerPoint Smartart helps save a lot of time on how to import more images to PowerPoint. Step 1. Go to Insert> Smartart> Category Image, to see the graphics with an integrated image placeholder. Step 2. Click on the Smartart chart and add it to your slide. Step 3. Click the placeholder to quickly add an image to the PowerPoint slide. Related articles: Articles:
