Version 1.0.5 We've introduced and upgraded some features to help you make even more amazing videos!

1. Performance and user experience optimizations

- So, I'm a very beginner editor and was happy to come across capcut seeing as that it was free and had great reviews. I have almost mastered this app completely and don't want to leave and switch over to something that's paid when capcut is doing things that every other editing service is doing. However, there is always room to grow, especially for the editors who's skills are growing faster and wanting more. A few of my recommendations is having more advanced and better options for speed. Please add more filters (specifically in the border area), and add ones that are different and will give our videos good quality (I'm pretty sure y'all can come up with something!). I ask that we get more font options and allow us to use more than 1 animation for out fonts PLEASEEE! Those are just a few of my recommendations. Now, on to my concerns the app does lag a little, and constantly says that I'm out of storage and I delete a lot of previous edits just to make new ones, and I'm getting concerned that the app will just not be enough for me. It's already taken up most of my storage and I really want it to be worth it, but all these glitches, lags, and thirst for storage is not going to make using this app worth it. I hope someone sees this, and I hope you have a great rest of your day/night. I love capcut! I appreciate how everything is free and how you can remove the watermark at the end. I have been using this app for like a year now and I think it's great and easy to use. I do have some recommendations though because I do find some little issues or something I would like to be better/fixed. so my first recommendation is that you guys should maybe add more animations to both, texts and clips. for the texts, I think it'd be cool to have more varieties to choose from. I know there's a lot of choices already but I mean that maybe if possible, there could be combos like there is for clips. I think it'd look great on edits and would be very useful. and now for clips, I think if you could add more ins and out transitions, it would be fun to be able to have more transitions. maybe you could even add more combos as well. id also think a new great addition would be if there were to be more shakes and stuff. I dont think theres many shakes to add to your edits so i think more would be cool. another suggestion is to make the speed adjuster. sometimes when i make it slower, it looks blurry or just doesnt look like it has the same quality as it would with normal speed. i do have more recommendations id like to share but i dont really know exactly how to explain it but if you could add/fix those things, I think the app would be 5x better!

2. Sadly, I can't do animation, like how I do it in KineMaster, but this is still AMAZING. the stickers are beyond adorable (some are like- uhm y'know that kind of EdGy but anyways-) it's a great app. It's actually a step up from KineMaster, which I did not expect. I'm so happy we are able to delete the watermark at the end, it's just great. And everything is free! it's awesome and it's pretty much everything you need (sadly no animation key thing.) the chroma key is SOO good. I can remove part of my green/pink screen in the background without any pink/green thing on my character or art disappearing! The effects are really nice and aesthetic, and some are just really cool. (some are kinda uhm weird imo) the effects are perfect for edits, the retro or vintage ones have to be my favorite! Also the in and out animations are cool, and there are some that are for the whole duration of the video/photo, which is cool. The customization abilities for the text are great. You can give the text a font, color, some special design (example: making it glow) in and out transitions, animations that last for the duration the text is on the screen, and you can put it in a text box or something, and there are some really cute ones! There is so much I haven't explored yet, and I know it'll probably be good. I recommend this app for beginners, pros, anyone really. 5 stars, 10/10 I love the app!

Sincerely, a person
